

SCUOLA DI ECONOMIA, MANAGEMENT E STATISTICA

Subject: Postgraduate degree course in Economics and Business Administration - curriculum
“**Business and Administration**”

To whom it may concern,

We are pleased to inform you about the call for applications for the degree course in **Business and Administration**, a two years postgraduate degree course taught in English in the Forlì campus of the University of Bologna, aimed especially at non-Italian students (deadline for application: April 30th 2015).

Compared to other similar courses offered at the University of Bologna or other universities, our degree in Business and Administration is distinctively focused on bridging disciplinary fields. Since real world problems do not come tagged as problems of (e.g.) law, economics or statistics, then our aim is teaching management, in a wide variety of settings, by exploiting the linkages of knowledge across such distinct disciplines.

Requirements for admission are holding an eligible first level Bachelor degree, some previous knowledge of economics, law and mathematics/statistics, as well as fluency in written and spoken English (B2 level). Our graduates will get employments as managers in all areas of activity (marketing, organization, finance) of industrial or financial businesses, as well as entrepreneurs or consultants for business start-ups.

For further information about the degree in Business and Administration, the requirements for admission and how to apply, see:

Yours faithfully

Prof. Raffaele Corrado
(Programme Director)
